Packed native library: libunity_demo.so
libunity_demo.so

UPX packer marker

The .so is packed with UPX. Packing hides the real code from static analysis and is common in obfuscated SDKs, cheats and malware loaders.

libcrypto_demo.so

OpenSSL 1.0.2u

OpenSSL 1.0.x/1.1.x is EOL and carries known CVEs; it is compiled into the app, so updates depend on the app vendor, not the OS.
